

Collecting Data + Data Flow

Submitted by MattWingo on Tue, 2013-04-16 22:12

Date:

Tuesday, April 16, 2013 - 22:00

Instrument List:

- [Green](#)

Discussion:

Data flow to trmm-fc has been activated for three 2DVDs. The VZW LTE internet connections are proving to not be very stable, therefore data flow may be slow.

SN25 will be checked on Thursday, wx permitting

SN35 requires leveling and calibration + data flow online

SN36 calibrated today (plane test) + data flow online

SN37 calibration checked, no plane test required + data flow online

SN38 wx permitting will be checked soon

SN70 wx permitting will be checked soon
